Raul Azzi Corsi

Software Engineer | C++, Python, React

São Paulo, Brazil · raul.azzi.corsi@gmail.com · github.com/raulacor · linkedin.com/in/raulacor

EDUCATION

Software Engineering · FIAP, São Paulo — First year

AAS, Cybersecurity · FIAP, São Paulo — Finishing

Coursework: Python, JavaScript & React, C++, Rust, Cybersecurity, Assembly, DevOps, IT governance

SELECTED PROJECTS

UkrAid · Python, asyncio, ACLED API, OpenStreetMap

- Python CLI that scores danger from the nearest ACLED conflict events with a distance-decay model, labeled Critical to Low.
- Finds the nearest hospitals, shelters and bus stations within 100 km via OpenStreetMap Overpass; lists air-raid alerts by region (UkraineAlarm API).

Steam Sales Radar · Python, BeautifulSoup, MongoDB, FastAPI, scikit-learn

- Crawler → MongoDB → FastAPI pipeline storing dated Steam discount snapshots, with stats and per-game history endpoints.

TV Time, Rebuilt · React, TypeScript, Vite, TMDB API

- Movie browser with routing, detail pages, Context-based watch-lists and a WebGL hero.

Async Rust Chat · Rust, async-std, Tokio, Serde

- Multi-room TCP chat server and CLI client exchanging newline-delimited JSON.

Black Hands Recon Bot · Python, discord.py, nmap

- Discord slash commands for nmap scans, gau URL discovery, crt.sh subdomains and ipinfo lookups.

SKILLS

Languages: C++, Python, Rust, TypeScript, JavaScript, C#, Assembly
Frameworks & data: React, Vite, Tailwind CSS, FastAPI, Flask, MongoDB, pandas, scikit-learn
Security & tooling: OSINT, nmap, ffuf, subfinder, Linux, Bash, Git, GitHub Actions, Docker
